

What is Disinfect Service?

- Rent A Stall Mat provides peace of mind at the show with a freshly sanitized stall, safeguarding your horse from common health risks associated with public equine facilities. We spray the floor, interior walls and stall front with a veterinarian approved sanitizer, Sani-T 10. This EPA registered broad-spectrum disinfectant provides protection against bacteria, fungus and viral contamination (including the Herpes Simplex virus). Prior to installation, the mats are cleaned with the same disinfectant.
